E2H [English to Hindi Character Converter]

E2H is very powerful software which is used to convert English Characters to Hindi. In present time in office there are different types of works going on simultaneously some are working for account some are working for management and other doing on other work of there needs or which is assigned to them., but during this time their arises the need to print a record or documents in other language other then English and to get computer print of this language seems to very hard because it might be possible that your computer do not support this other language fonts or if it supports then also to type in this language are bit harder.

If this other language is Hindi then it seems that it is just impossible for a person to type a Hindi document, who does not know Hindi typing or do not have command over Hindi typing .So we at Multiicon recognized this limitation of common office work and we have developed E2H character converter... which is very useful to type Hindi. It is as simple as you type English language and speaks Hindi or same as typing Hindi SMS in English which we are doing in day to day life. For ex you want to type D[ZF EFZT then you can type it as meraa bhaarata . So in simple by typing in English we can type Hindi document easily.

English 2 Hindi is a software which is developed for day to day routine works which requires the Hindi typing in office or for any personal work.

To operate the E2H software is very easy and simple there are different types of options available in E2H this different options are as follows

- New.
- Open.
- Save.
- Export.
- Extra Characters.
- Help.
- Online Help.

New

Like any Microsoft document if want to open a new page then you can do it with help of **New** option given up in the window. With the help of this option you can open a new document and start your work very easily. If any previous document is open then it asks whether to save or not?

Open

If you want to open any previously saved document then you can do it with the help of this **Open** option given in the top of the window. This option is very useful when you want to open any saved document.

Save

To save any work which you have completed then that you can do with the help of **Save** option given in the top of the window. After when needed you can open that saved file same as any Microsoft file.

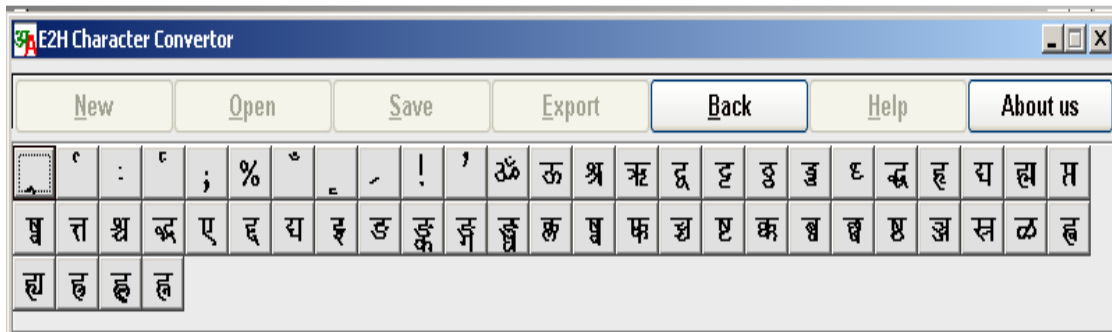

Export

Export option is very important and advance option available in E2H. In **Export** option you can transfer the work done to the Microsoft word. So when any wants to get print of that work then you can get it very easily from Microsoft word.

[Note : In Demo version you can transfer only 25 characters to Microsoft Word]

Extra Characters

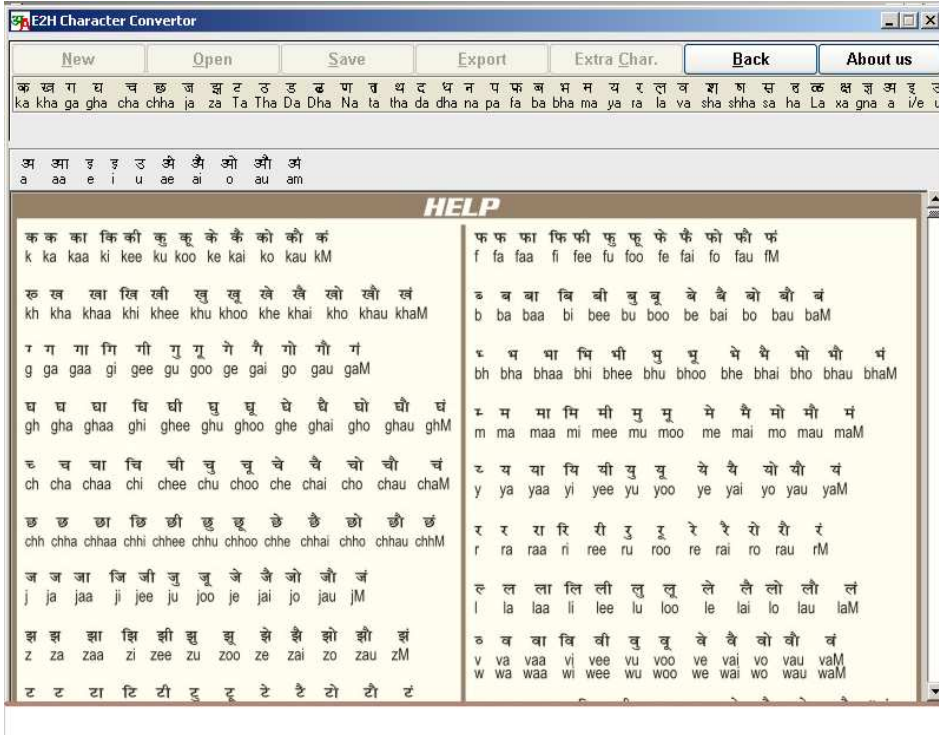

In E2H there are sets of Hindi characters which are very hard to type. So we have given this Hard character ready made at the top in the extra characters window so when needed you just have to press that character and that character will be type on its own.

So as seen in the above window you just have to press the character button and that character will be typed in the Hindi window.

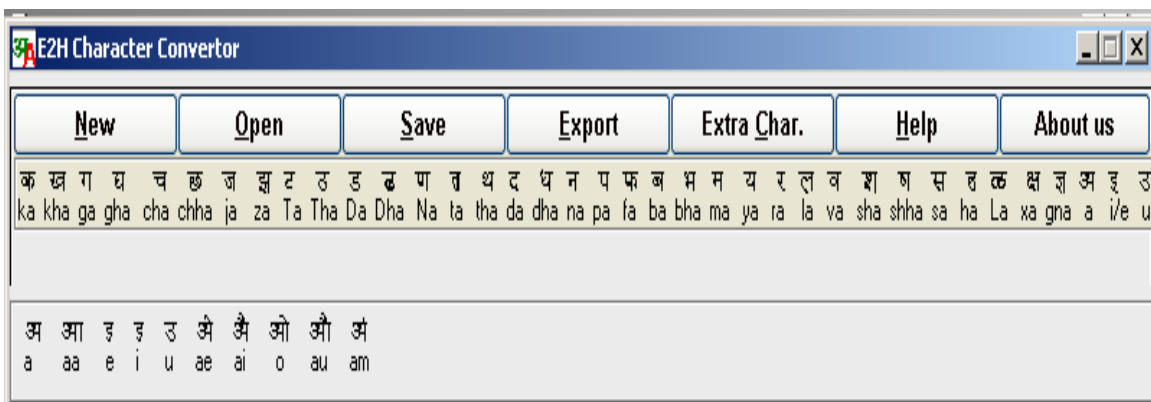

Help

In **Help** we have given a window which is seen in the center of the screen this window shows all the character help which is useful in typing. So when any user gets trap in the situation then he can see the help and can processed easily by getting the help of that particular character.

Online Help

This is a very important features added in this software. In this option you are getting only help depending on the characters that you are typing in the window so by typing you can see the online help in the screen on the top. So when you get into the trouble or get hold at any place then you can see the online help and can type according to it.

Thus E2H is the complete package which is useful to type in Hindi language and with the help of this software you can do all type of typing work which you want to be Hindi very easily.
